Summary

I am a doctoral student and full stack roboticist. I have an array of hard skills across design, hardware, software, and algorithms, complemented by strong data analysis, experimental design, and communication skills, allowing me to enter new project spaces, rapidly gain domain knowledge, and go deep into problems to generate answers and solutions. I am passionate about learning, working on meaningful problems, pushing the boundaries of technology, and mentoring the next generation.

My PhD work has focused on understanding the use of social robotics for upper extremity rehabilitation and computer vision for objective assessment in upper extremity rehabilitation. I have prior experience in computer vision for industrial automation and medical device design and manufacturing.

I am currently searching for a team working on exciting problems to join for a summer 2021 internship in Seattle.

Education

Doctor of Philosophy in Mechanical Engineering

Aug 2016 – Expected Dec 2021

University of Pennsylvania

Advisor: Dr. Michelle Johnson.

Affiliated with the General Robotics, Automation, Sensing, & Perception Laboratory (GRASP Lab).

Master of Science in Robotics

Aug 2016 – Aug 2019

University of Pennsylvania

Bachelor of Science in Biomedical Engineering

Aug 2012 – Dec 2015

Georgia Institute of Technology

Minor in Computer Science

Skills

Programming Languages

Python, R, MATLAB, TypeScript, SQL, C++

Robotics

ROS, HRI, Kinematics, State Estimation, System Integration, Mechatronics

Mechanical Design

MCAD, Technical Drawing, RTV Molding, 3D Printing, Classical Machining

Software Infrastructure

PyTorch, Docker, Git, NGINX, NodeJS, Redis, PostgreSQL, React

Funding

NIH F31 Predoctoral Fellowship (F31HD102165)

Apr 2020 – Present

University of Pennsylvania Fontaine Fellowship

Sept 2016 – Apr 2020

Experience

PhD Student

Aug 2016 – present

University of Pennsylvania, Rehabilitation Robotics Laboratory

Socially Assistive Robot for Upper Extremity Telerehabilitation

- Led hardware design and software integration for the development of an affordable socially assistive robot (Lil'Flo) to aid in telepresence based assessment and treatment of patients with upper extremity motor impairments (<https://youtu.be/DDZe1RhcpWY>).
- Developed and now implementing experiments to determine how patients react to telepresence robots which incorporate social robots and how that affects remote assessment.
- Developing a framework for identifying motor function from video of a patient doing various robot guided activities using both classical computer vision and machine learning techniques.
- Mentored and managed over a dozen students doing research within the project.
- Presented work in papers, posters, and talks.

Research Technician II

Aug 2015 – Jun 2016

*Georgia Institute of Technology, IRIM Technology Transition Laboratory***Edge-Based Tracking for Flexible Manufacturing**

- Refined a C++ video based real-time textureless tracker from a research code base to a well documented robust system capable of running at 30+ fps at 1920 × 1080 pixels, to enable manipulation on non-fixed, non-located car parts at a partner automotive facility.
- Supported industrial partner in successful technical demonstrations to management.
- Developed tools for calibrating multiple robot arms to cameras.
- Integrated perception and motion control to track moving targets with a collaborative robot.

Automation Intern

May 2015 – Aug 2015

*Eli Lilly and Company***Offline Plant Simulations for Automation Development and Testing**

- Rapidly learned automation systems being used (Emerson DeltaV and Rockwell).
- Evaluated options for offline software/hardware/operator in the loop plant simulations for process validation, control code development, pre-factory acceptance testing control system checkout, operator training, and process improvement.
- Reported on findings in both a technical paper and oral presentation.

Machine Shop Supervisor

Aug 2014 – May 2015

Georgia Institute of Technology, TEP Machine Shop

- Guided Master's in Biomedical Innovation and Development students in design and prototyping of medical devices.
- Supported the Cardiovascular Fluid Mechanics Lab and the Tissue Mechanics Lab in development and fabrication of experimental equipment.

Product Development Engineering Co-Op

Jan 2014 – Jul 2014

*Unilife Corporation***Product Development and Manufacturing for Injectable Drug Delivery Devices**

- Tested prototypes for both usability and engineering constraints and iterated on design.
- Developed and prototyped new product concepts based on customer needs.
- Designed, procured, assembled, and programmed automation equipment for syringe component gluing, assembly, and finish operations.
- Worked with vendor to design and procure sterilizable packaging for 1MM annual units of product.

Awards & Honors

Penn Wharton Entrepreneurship Startup Challenge Innovation Award	May 2020
Rothberg Catalyzer First Place	Nov 2019
Hispanic Scholarship Fund (HSF) Scholar	Dec 2016
Georgia Institute of Technology OMED Tower Award	2015
Georgia Institute of Technology Dean's List	2012 – 2014
Auburn University Dean's List	2011 – 2012
The Auburn National Scholars Presidential Scholarship	2011

Ventures

MAR Orthotics	Oct 2019 – Present
<i>Co-Founder & President</i>	
Novel Orthoses for Pediatric Cerebral Palsy	
<ul style="list-style-type: none"> Public face of company, successfully pitched through multiple innovation and business competitions to win competitive awards. Performing customer discovery and validation to refine product market fit. Working on technical design. 	

Professional Development

Neuromatch Academy	Summer 2020
---------------------------	-------------

Teaching Experience

Teaching Assistantships

Lead Teaching Assistant for MEAM 147: Intro to Mechanics Lab	Fall 2018
Teaching Assistant for MEAM 211: Undergraduate Dynamics	Spring 2018
Teaching Assistant for MEAM 147: Intro to Mechanics Lab	Fall 2017

Guest Lectures

Robots in Pediatric Rehabilitation	Nov 2018, 2020
Course: Bioengineering 514: Rehab Engineering and Design	
Robots in Pediatric Rehabilitation	Apr 2018
Course: Robots in HealthCare: From Science Fiction to Reality	
Robot Inspiration: Artificial Intelligence, the Brain, and Programming	Mar 2018
Course: Robots in HealthCare: From Science Fiction to Reality	

Talks

Global Perspectives on Medicine, Rehabilitation, and Robotics Webinar Series	Nov 2020
Using Social Robots for Remote Assessment of Children With Disability	
Penn MEAM Department Seminar	Jul 2020
The Design of Lil'Flo, a Socially Assistive Robot for Upper Extremity Motor Assessment and Rehabilitation Via Telepresence	

Service

Community Service

UPenn Bioengineering BETA Day Volunteer	Jan 2020
Tech Girlz Circuit Workshop Volunteer	Jan 2020
Girls Advancing in STEM (GAINS) Lab Tour Lead	Nov 2019
Philadelphia Robotics Expo Volunteer	Oct 2019
Philadelphia Maker Faire Volunteer	Oct 2019
Upward Bound Growing out of the Stereotypes Workshop Lead	Dec 2018

EL Education Future of Work Conference Interviewee	Nov 2018
Participated in RET: Leveraging Our Collective Impact Conference	Oct 2018
Philadelphia Robotics Expo Presenter	Oct 2018
GRASP NSF Research Experience for Teachers Program	Summer 2017 & Summer 2018
Mentored three middle school teachers through a six week research experience covering the entire scientific process. Visited their classrooms a total of six times to demonstrate state of the art research and teach lessons.	
Be a Pennovator Workshop Lead	Apr 2018
Penn Science Olympiad Volunteer	Feb 2017
Penn First Lego League Judge	Feb 2017
Penn-Alexander School Science Fair Judge	Dec 2016
University Service	
Penn Doctoral Diversity and Inclusion Board Member	Jun 2020 – Present
GRASP Student Advisory Committee Member	Jan 2020 – Present
Mechanical Engineering Graduate Association Vice President	Sept 2017 – Sept 2018
Reviewer	
Journal of Rehabilitation and Assistive Technologies Engineering	2020
International Conference on Robotics and Automation	2017, 2020
International Conference on Intelligent Robots and Systems	2018, 2020
HRI Conference	2020–2021
Conference Volunteer
